

Please do not reduce our access to Video Relay Services. As Helen Keller stated, being deaf is worse than being blind as it cuts you off from people. VRS provides an excellent "people" avenue. The traditional TRS is a very superficial way to connect with people (estimated to take seven times longer and our hearing counterparts do not enjoy talking to us). VRS is about connecting with people in a genuine manner and is REAL. Through VRS, people love us ... please do not cut us off from people.
